AWS SQL Firebase

WORK EXPERIENCE

Full-Stack Developer

Keep

01/2024 - 12/2024

Achievements/Tasks

- Played a key role in refining and enhancing the UI and core features of one of Keep's main products, credit cards. Contributed to functionalities such as creating new cards, adjusting credit limits, freezing or closing cards, and viewing transaction histories associated with each card
- Contributed to the smooth launch of the physical card project by improving existing workflows and optimizing the user experience, ensuring customers could seamlessly create their first physical card from the app
- Full-stack development for the accounting management system, empowering customers to manage expenses in Keep. Key features included receipt uploads with automatic matching via SMS and email, expense categorization with enriched data, integration with QuickBooks Online (QBO), and seamless synchronization to customers' accounting books
- Worked on roles within the Keep users. Making it easier for users to invite employees to their current business with different permissions, like admins, accountants and cardholders
- Leveraged TypeScript across all applications within the project, gaining strong proficiency in technologies such as Next.js, GraphQL, Prisma, tRPC, and webhooks to build robust and scalable solutions

Full-Stack Developer

BluBear S.A

05/2023 - 12/2023

Achievements/Tasks

- Developed from scratch the full-stack 1001carros.com ecosystem, including the administrator platform using the VILT stack to manage inventory, users, and pages, as well as the main website built with Nuxt 3 and deployed using Server-Side Rendering
- Design and maintain a cloud architecture using AWS services for deploying various projects. The services utilized include Lambdas, EC2, ELB, S3, CloudFront, API Gateways, among others
- Integration of Meilisearch as an intelligent search engine to enhance search optimization
- SEO Optimization of the 1001carros.com website for Google's search engine
- Use of the SCRUM framework as an approach for agile software development

Full-Stack Developer

WOMPAD S.A

11/2021 - 06/2022

Achievements/Tasks

- Full-stack development using jQuery on the frontend and PHP on the backend. Proficiency in relational database management
- Development of new modules for the CMS of online stores, from database tables to frontend views
- Integration of new features into the purchasing process of the stores: discount coupons, free shipping, etc
- Use of the SCRUM framework as an approach for agile software development

WORK EXPERIENCE

Front-End Developer

Box Solutions

06/2021 - 10/2021

Achievements/Tasks

- Front-end development of a web platform with Angular 11, utilizing Angular Material as the framework for styles
- Integration of a serverless database with Firestore from Firebase
- Authentication via Firebase
- Forms and data export to Excel files

EDUCATION

Computer Science Engineering

Escuela Superior Politécnica del Litoral

10/2018 - 08/2023

Courses

- Web/Mobile Development
- Databases
- Software Engineering
- Cloud Computing

CERTIFICATES

AWS Certified Cloud Practitioner (03/2023 - 03/2026)

PERSONAL PROJECTS

Ron San Miguel (05/2023 - 08/2023)

- From design in Figma to production code. Front-end development of the Ron San Miguel website using Next 13 for SSR. Hosting the application through SST and AWS serverless services, including Lambdas and API Gateway

Online Multiplayer Card Game (11/2022 - 01/2023)

- Development of a WebSocket server using Node.js, Express, and WS. Implementation of a serverless hosting infrastructure using AWS services, including Lambdas, API Gateway, and S3 for the WebSocket server, while the client is hosted on itch.io. Client development in Godot using GDScript

Proalco (01/2022 - 02/2022)

- Development of the website using Angular and SCSS. Cloud hosting of the application with Amplify. Implementation of an email service using AWS SES
